Course Overview

World History is a full-year study of the development of social, political, and economic institutions which characterize civilization from the 1300s to the late-1930s.

First semester examines the Renaissance and Reformation through to the Industrial Revolution. Second semester addresses the rise of nationalist movements and spread of democracy and concludes with the oncoming German nationalist movement in Germany.

The content of this course surveys the history of all cultures and addresses topical issues common to the progressive changes made by humans. Students will develop inquiry and communication skills while covering the course material.

Materials and Resources

Students must obtain the following materials for the class:

Notebooks

Spiral-bound notes are preferable as it is easier to maintain notes.

Recommended: 3- or 5-subject spiral notebooks; college-or wide-rule is acceptable.

Writing aparati:

The teacher prefers pens due to the increased difficulty with which it takes to erase writing in this manner.

It is strongly recommended that only shades of blue ink or black pens be used due to the teacher's partial blindness in one eye which makes it extremely difficult to read bright or otherwise obnoxious colors. Points on assignments, projects, and tests if the teacher is unable to read what is written.

Pocket folder:

Not recommended but encouraged because humans (teachers and students alike) are notoriously forgetful and are prone to losing stuff.

There are no general requirements for the type, size, color, and constitution of the folder.

Additional materials:

Other materials may be required by the teacher through the progression of the class. Should additional materials be needed, the teacher will provide adequate notice so that such provisions may be obtained.

Additional materials may be provided by the teacher upon request of the student.

Prerequisites

Students must be in high school standing.

Unit: Industrial Revolution

Duration: 20 Day(s)

Unit Description

This unit examines the political, geographic, economic, and social change that occurred as a consequence of the birth of science and technology. Agricultural changes, the factory system, and steam power sparked the Industrial Revolution. Effects of industrialization included rapid urbanization and the rise of the new middle class. Early working conditions in factories and mines were harsh, but later improved upon. Laissez-fair economists like Adam Smith favored free enterprise and limited government control, while Karl Marx called for workers to control means of production. In the second Industrial Revolution, technology revolutionized production, transportation, and communication. Different responses to industrial society led to new artistic movements.

Unit: Rise of Nationalism and Spread of Democracy

Duration: 10 Day(s)

Unit Description

This unit comprises an extremely important and volatile period in world history, 1790-1914. The "Long Century" represented a transition from monarchical power and authority to the onset of nationalist tendencies and the spread of democratic institutions around the world. After Napoleon's defeat, conservatives tried to restore monarchies while liberals called for constitutional governments. Nationalism and liberalism led to a series of revolutions in Europe. Nationalism led to the unification of Germany and Italy, but threatened the Austrian and Ottoman empires.

Enduring Understandings (Knowledge & Skills)

By the completion of this unit, students will be able to perform the following actions:

1. Identify the factors that promoted German nationalism;
2. Analyze how Bismarck achieved German unification;
3. Describe the German empire under Bismarck;
4. Explain the policies of Kaiser Wilhelm II; and
5. Explain how nationalism challenged Austria and the Ottoman Empires.

Unit: Age of Imperialism

Duration: 2 Week(s)

Unit Description

In this unit, the age of imperialism and colonial conquests takes center stage. The era begins approximately in 1800 and concludes with the start of World War I. Motives for imperialism included the need for natural resources and new markets, racism, and the desire to spread Christianity. Using superior military technology, European powers divided up most of Africa and Southwest Asia, while India became a British colony. Many people resisted European rule, but Ethiopia and Siam avoided colonization.

Enduring Understandings (Knowledge & Skills)

By the completion of this unit, students will be able to do the following:

1. Explain the political, economic, and social causes of European imperialism;
2. Understand how technology and other factors contributed to the spread of imperialism;
3. Describe the characteristics of imperial rule;
4. Summarize the cultural, political, and social effects of imperialism;
5. Describe the forces that shaped Africa in the early 1800s;
6. Explain why European contact with Africa increased;
7. Analyze how European nations carved up Africa;
8. Describe African resistance to imperialism;
9. Explain how internal and external pressures shaped the Muslim world;
10. Identify the challenges facing the Ottoman Empire and Persia; and
11. Describe the ways Egypt tried to modernize, including the opening of the Suez Canal.
